[What is the current version of BBEdit and what system version does it require?](#)

FAQ-1

BBEdit 12.5 requires macOS 10.12.6 or later, and is fully compatible with macOS 10.14 "Mojave". (It will not run on any prior OS version.)

Respuesta FAQ-1

[How do I select a column of text within BBEdit?](#)

FAQ-2

Just hold down the Option key (the mouse cursor will change to a cross shape) and then drag to make a rectangular selection. Please note the "Soft Wrap Text" option must be turned off in order to make a rectangular selection. (You can turn off soft wrapping in the current document via the Text Options popup in the toolbar, or in the Text Options sheet.)
